

FM Tactical Gears offers advanced Level 3+ Silicon Carbide Bullet Proof Plates, designed to deliver high-level protection with exceptional weight reduction. Engineered with cutting-edge Silicon Carbide material, these plates are ideal for users who prioritize mobility, agility, and comfort without compromising ballistic safety.

Tested to withstand up to 3 direct hits from high-velocity rifle rounds, including 7.62×39mm, 7.62×51mm, 5.56×45mm green tip, and .223 (non-AP), these plates offer reliable defense in dynamic and high-risk environments. With a significantly lighter weight of just 1.5 kg per plate, they are perfect for extended missions and rapid-response operations.

Favored by elite military units, tactical teams, and personal security professionals, our Silicon Carbide plates ensure next-level maneuverability and effective threat protection.
