

FM Tactical Gears presents the FAST High Cut Ballistic Helmet, engineered for elite protection, advanced comfort, and full mission adaptability. Designed with Aramid Fiber Kevlar, this NIJ Level IIIA certified helmet provides outstanding defense against handgun threats and fragmentation, making it ideal for military, law enforcement, and tactical response units.

This lightweight, high-performance helmet offers a coverage area of 1,250 cm², with ballistic protection capable of stopping 9mm and .357 SIG FMJ rounds, as well as high-velocity fragments up to V50 2212 ft/s. It also withstands 3–5 ballistic impacts, maintaining structural integrity under pressure.

Key Features:

Ballistic Material: Aramid Fiber Kevlar

Protection Level: NIJ Level IIIA (0106.01)

Weight: Approx. 3.5 lb

Protection Area: 1250 cm²

Sizes: Adjustable (21.6 – 24.8 in)

Colors Available: Black, Green, Desert

Bullet Resistance: 9mm & .357 SIG, 3–5 hits

Fragmentation Resistance: V50 tested at 2212 ft/s (674.2 m/s)

Certifications: CE, NIJ, ISO, BSCI

Tactical Design & Technical Advantages:

Fully adjustable suspension system and hydrophilic padding for superior fit and moisture-wicking

4-point chin strap with leather grip and quick-release buckle for secure and fast donning

Integrated Picatinny rails, night vision shroud, and bungee retention cords for tactical attachments

Laser-cut edges with rubber trim and drop-tested shock absorption per EN-397

Non-magnetic, non-corrosive, and temperature-stable components for all-environment performance

Compatible with communication systems, eyewear, gas masks, and night vision devices

This helmet delivers multi-hit protection, exceptional shock resistance, and ergonomic stability—ensuring maximum comfort and operational performance in the field.
